

Traumatic Brain Injury (Hybrid)

SHORT COURSE

12th June 2024 (Wednesday)

Duration: One Day

Course Lead: Dr Colette Griffin

Fee: From £20

Traumatic brain injury (TBI) is a very important aspect of medical education and is often not taught specifically in either undergraduate or postgraduate courses. St George's has one of the few TBI services in the country, and the TBI team have developed this one-day teaching course to focus on the clinical management of this patient group. A particular focus will be the inter-disciplinary team management and the entire MDT will be presenting during this teaching day.

This is a hybrid course and delegates can choose to attend face to face or online via MS Teams.

For booking and more information: www.sgul.ac.uk/brain

Designed by leading experts to help develop your career and keep ahead of developments in medicine, healthcare and science in a way that suits you.

Traumatic Brain Injury (Hybrid)

SHORT COURSE

WHY JOIN THE COURSE

The course will cover: TBI presentations, and the common complications of the pathology, understanding the importance of inter-disciplinary team working, and how the various allied healthcare professional members of the team integrate with the medical staff. We will also concentrate on important topics such as the Mental Capacity Act, Deprivation of Liberty and the management of the acutely behaviorally disturbed patient.

These are all critical to all healthcare professionals on a day-to-day basis. It is hoped that learners who complete the course will be able to:

- Understand the way in which an MDT work together in an inter-disciplinary way.
- Understand the common presentations of a patient with a TBI.
- Understand the principles behind the treatment of the acutely agitated patient.
- Understand the Mental Capacity Act and Deprivation of Liberty clause, and why these are important patient safeguards.

WHO SHOULD ATTEND

The course is aimed at: Postgraduate clinical staff, including nurses, allied health professionals and medical staff.
