

# **Integrating data collection and analysis across the rehabilitation pathway**

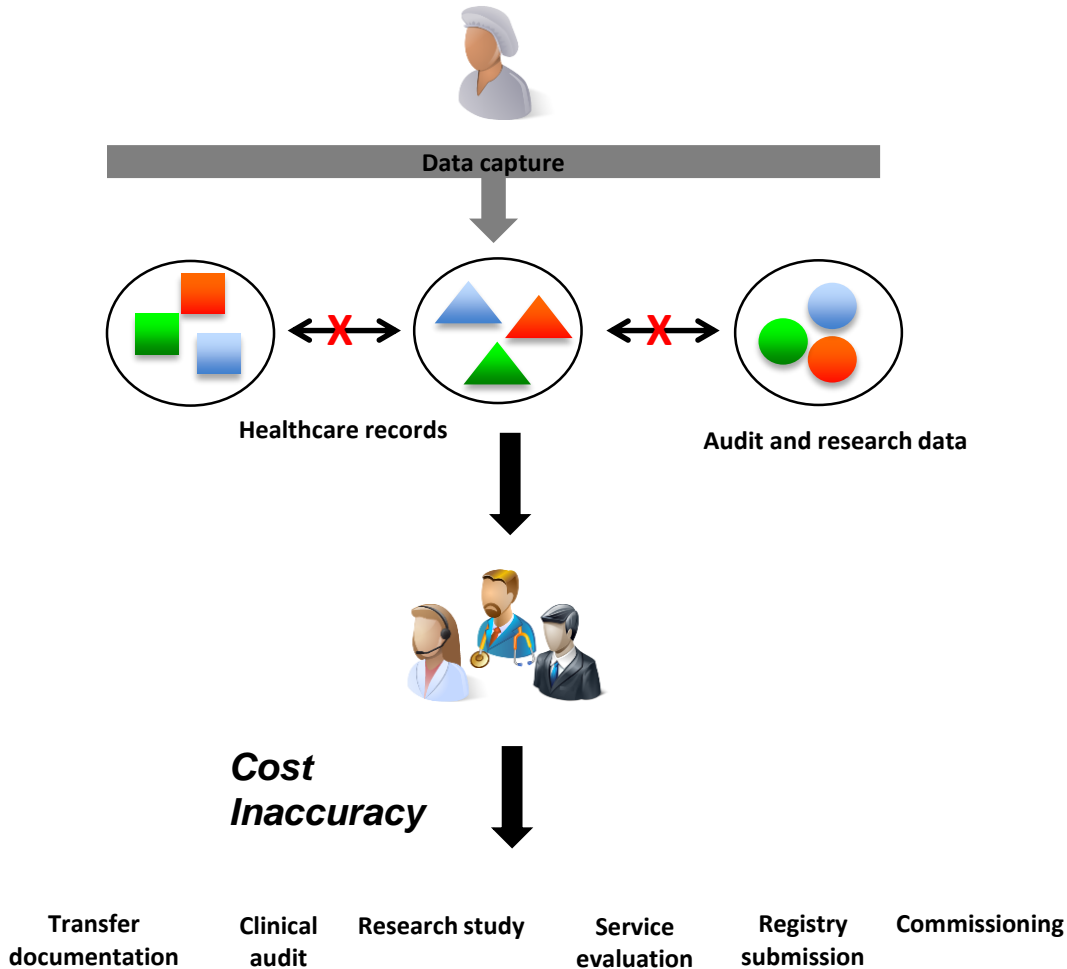

**Alexis Joannides**

Clinical Lecturer in Neurosurgery  
University of Cambridge

# Challenge I – patient and service heterogeneity

# Challenge II – repurposing clinical data without duplication

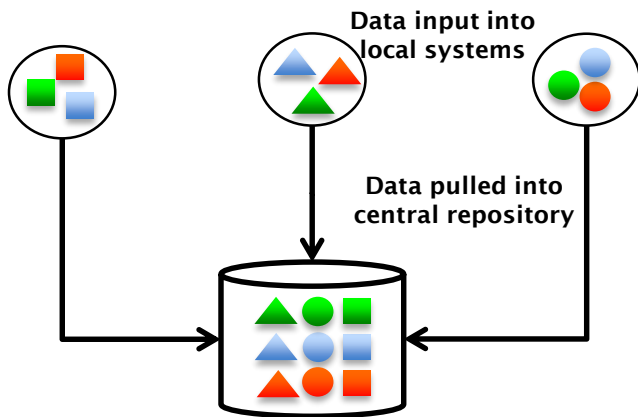

**Service devolution**  
across sites  
across specialties

**Data duplication**  
operational service  
audit and evaluation  
academic research

**Technical challenges**  
system compatibility  
data compatibility  
cost

# Approaches to integrated data collection

## Inward central data feed

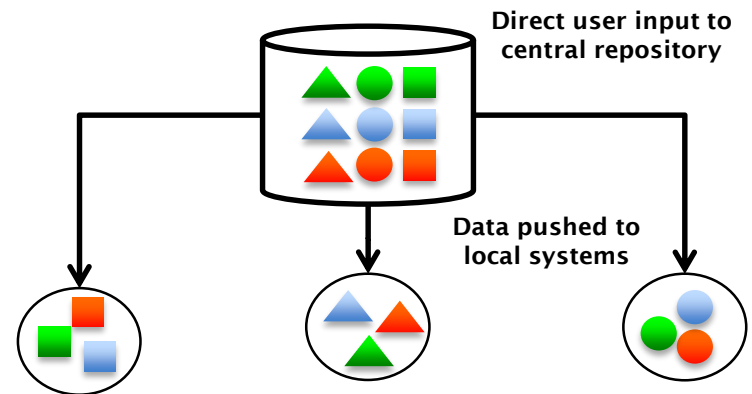

Local user familiarity

Limited by quality of local data / systems

Individual interfacing requirements

Not easily amenable to updates

## 'Inverted' data feed

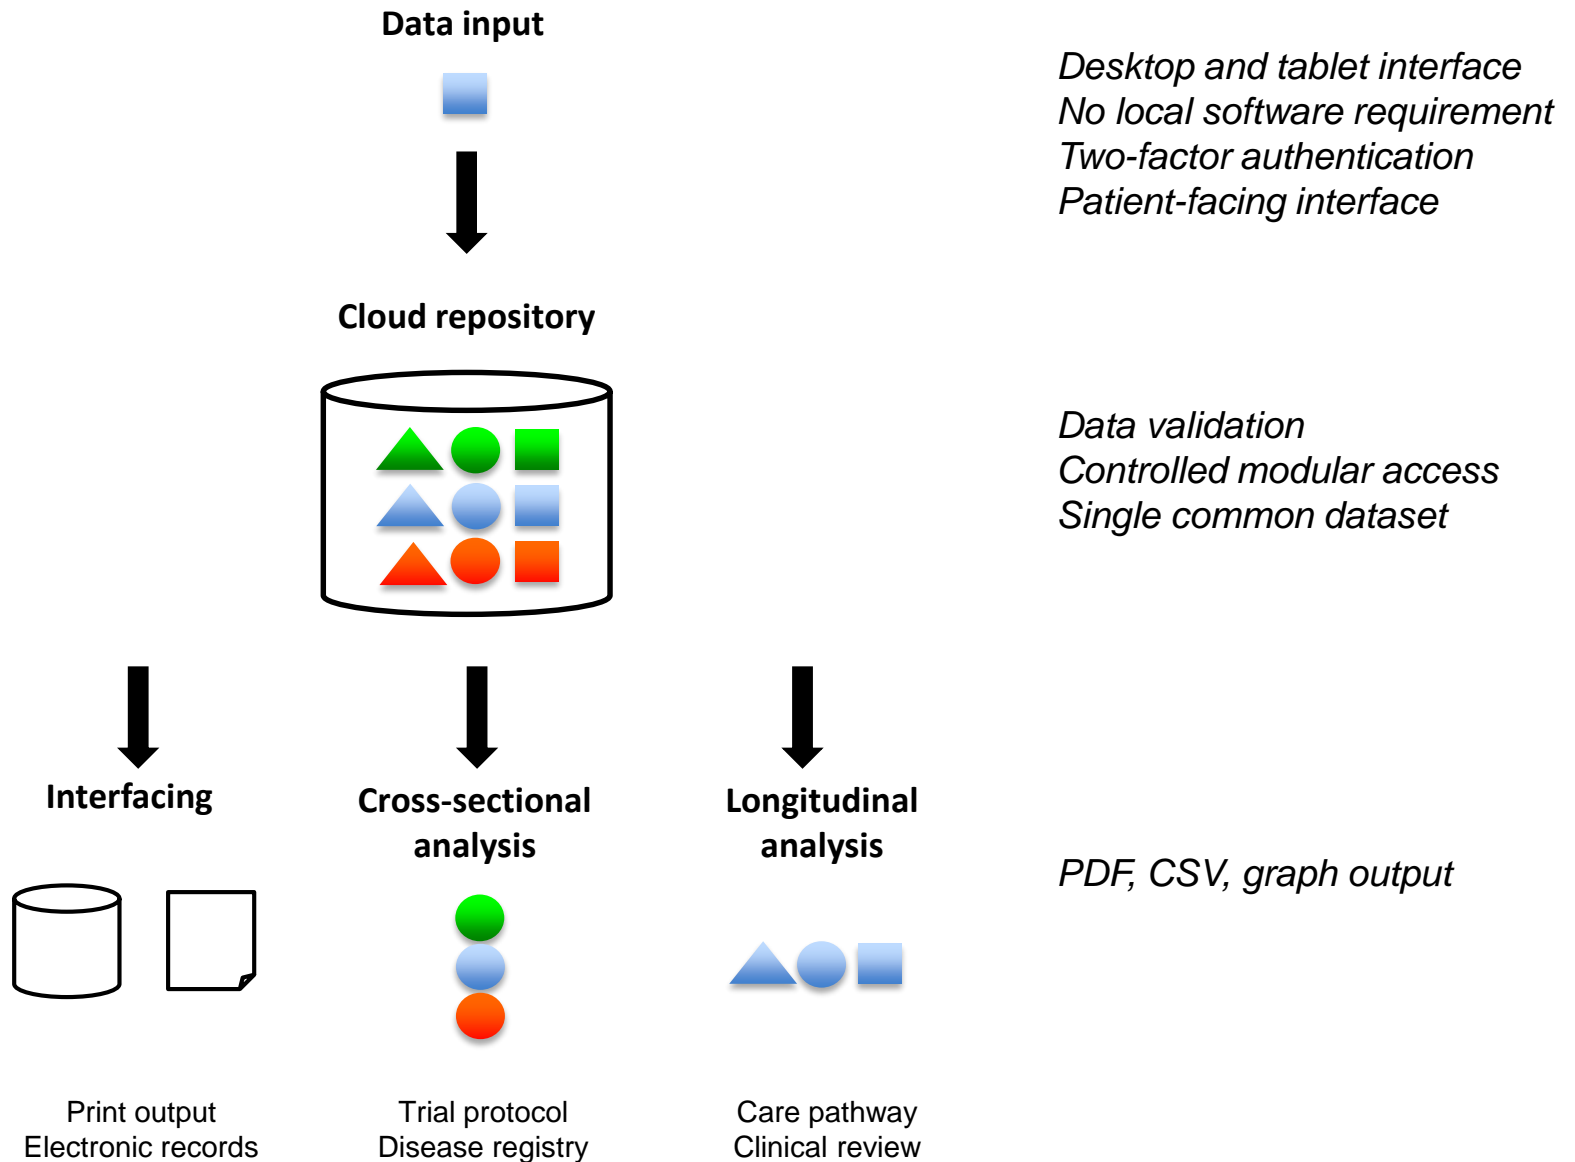

Control over dataset quality  
Rapidly scalable and adaptable

User training

Local unit engagement

# Outcome Registry, Intervention and Operation Network (ORION)

a national platform for integrating clinical data collection for multiple uses

# ORION project portfolio

## Frontline services

### Referral management

- Emergency calls
- Subspecialty portals

### Service provision

- Trauma rehabilitation prescription
- Network referral system
- Ward tasklist

### Integrated care

- DAMSEL (neuro-oncology)
- IRMA (integrated rehabilitation)
- MND-CARE

### Prospective national registries

- Vestibular schwannoma registry
- CSF shunt registry
- Childrens Epilepsy Surgery Service National Database
- DBS registry

### Studies and audits

- Melatools-Q
- National EVD audit

case  
ascertainment

data  
availability

Monitoring and  
research

# Oversight and Regulatory framework

Society of British Neurological Surgeons  
 Childrens Epilepsy Surgery Service National Board  
 British Skullbase Society

Department of Clinical Neurosciences

**Data Monitoring and Oversight Committee(s)**

**Steering Committee**

**Informatics Research Group**

**Network Administration Team**

**Software Development Team**

Annual reports

Publications

Grants

Pilots and module rollout

Engagement and publicity

Record administration

User administration

Application support

Module development

Log and backup monitoring

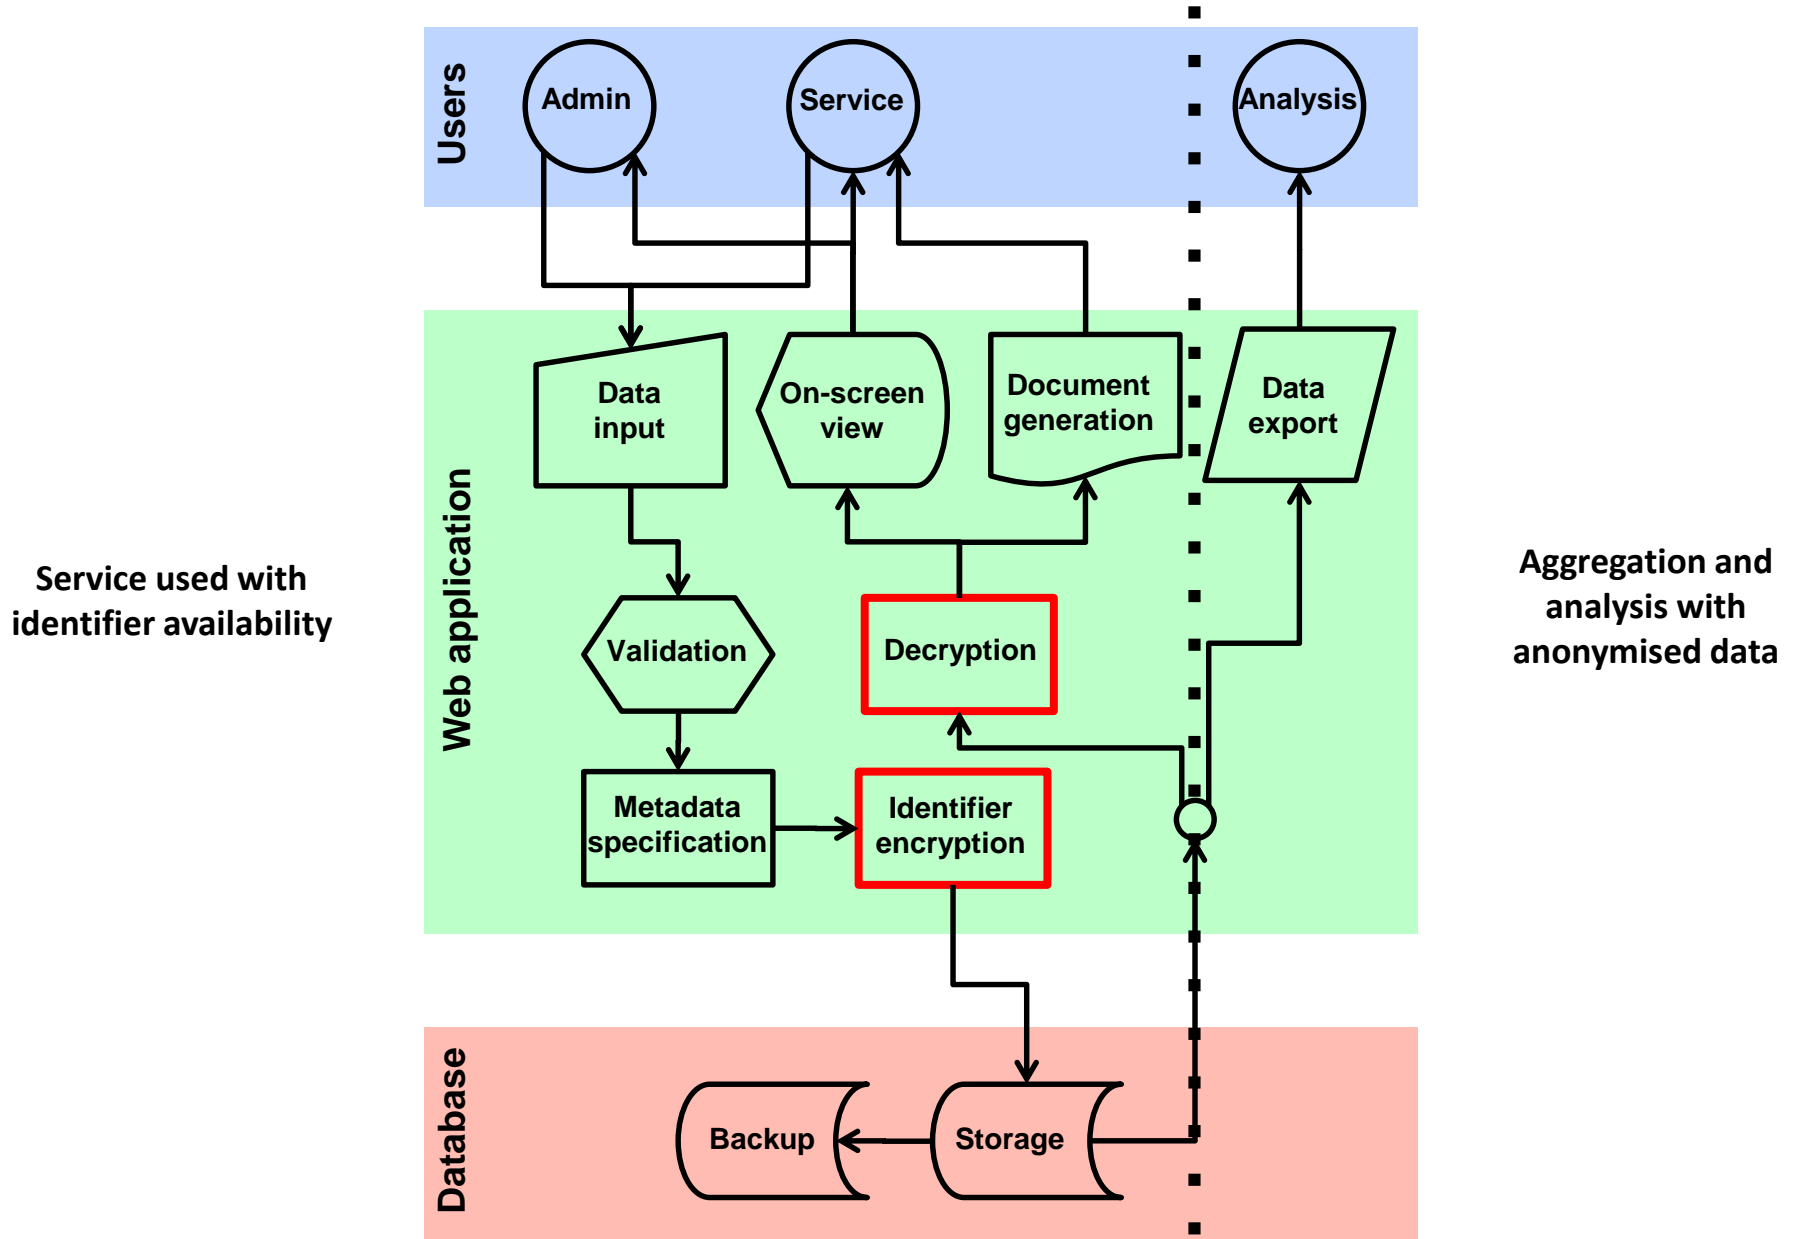

## Policies and procedures

- Technical and Security Specification
- Subscription Terms and Conditions
- Operational Policy
- System Access and Data Policy

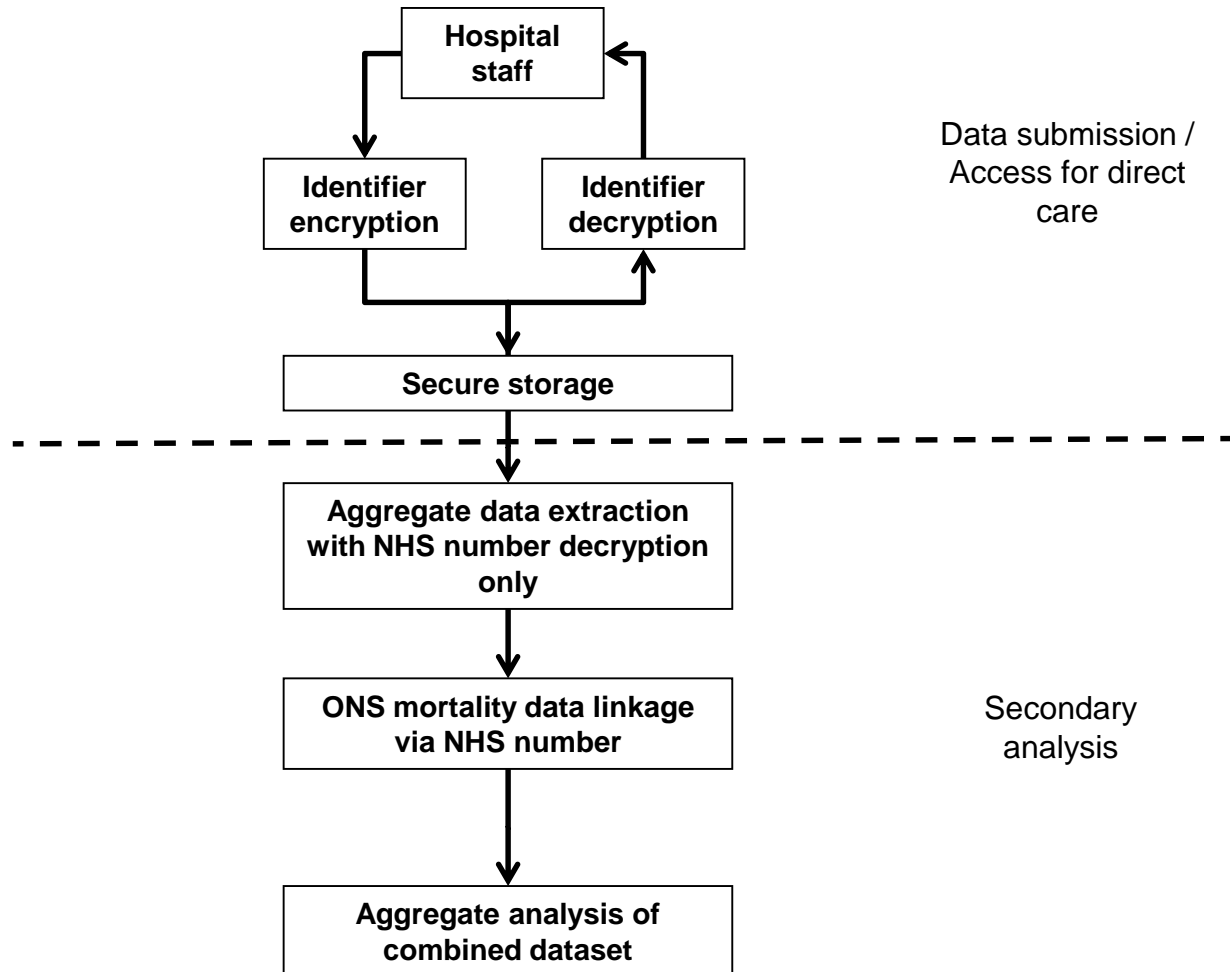

Annual IG toolkit submissions

# Reconciling data protection and analysis

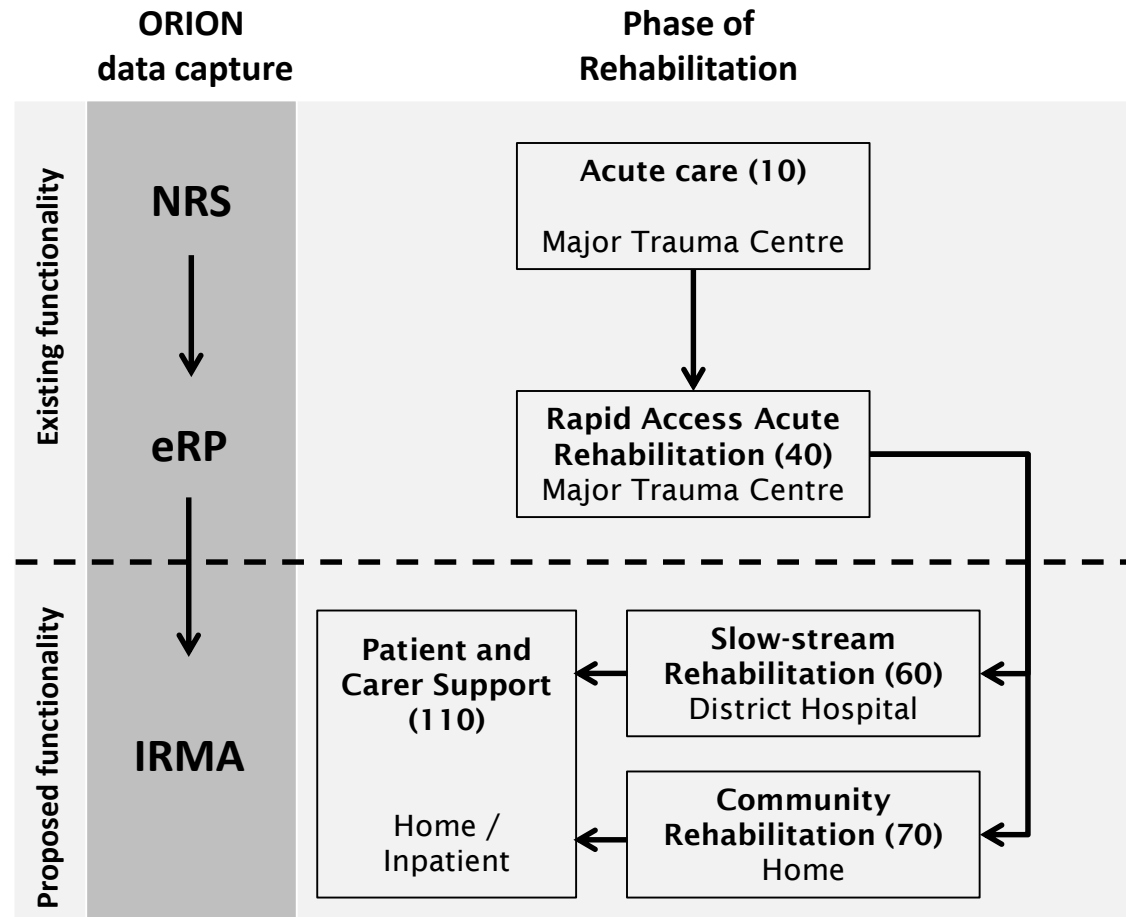

# Utilising identifiable data for analysis - UKSR data flow

# Tracking progress through the rehabilitation pathway

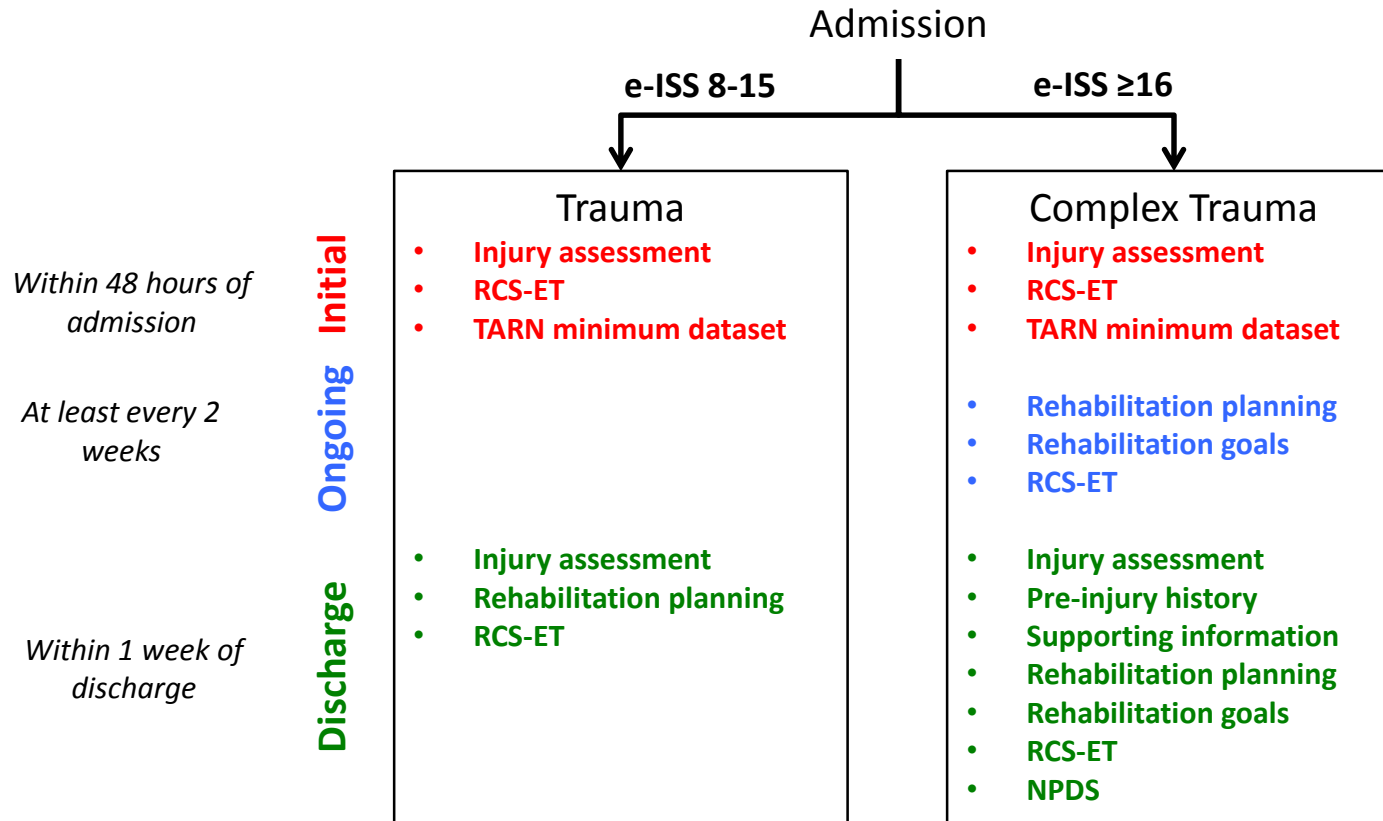

- *Data capture and patient flow*
- *Interfacing and data sharing*
- *Reporting, benchmarking and service evaluation*

# Identifying patients with traumatic injury

# Establishing a baseline for measuring rehabilitation progress

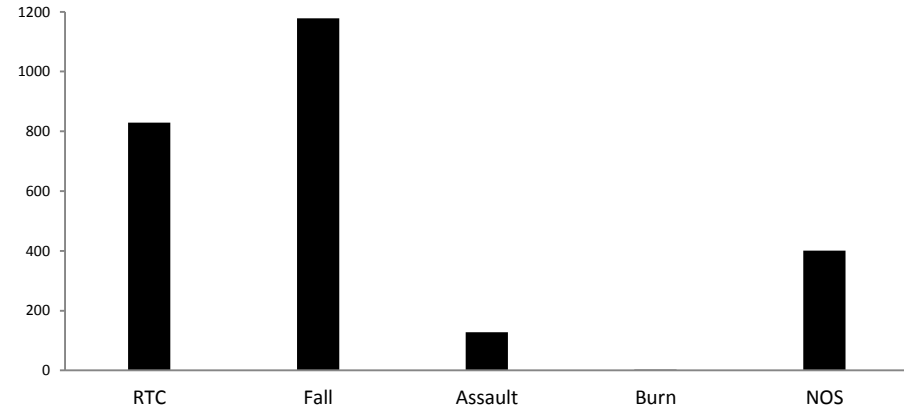

# Establishing a baseline for measuring rehabilitation progress

## Pre-injury status

## Mechanism of injury

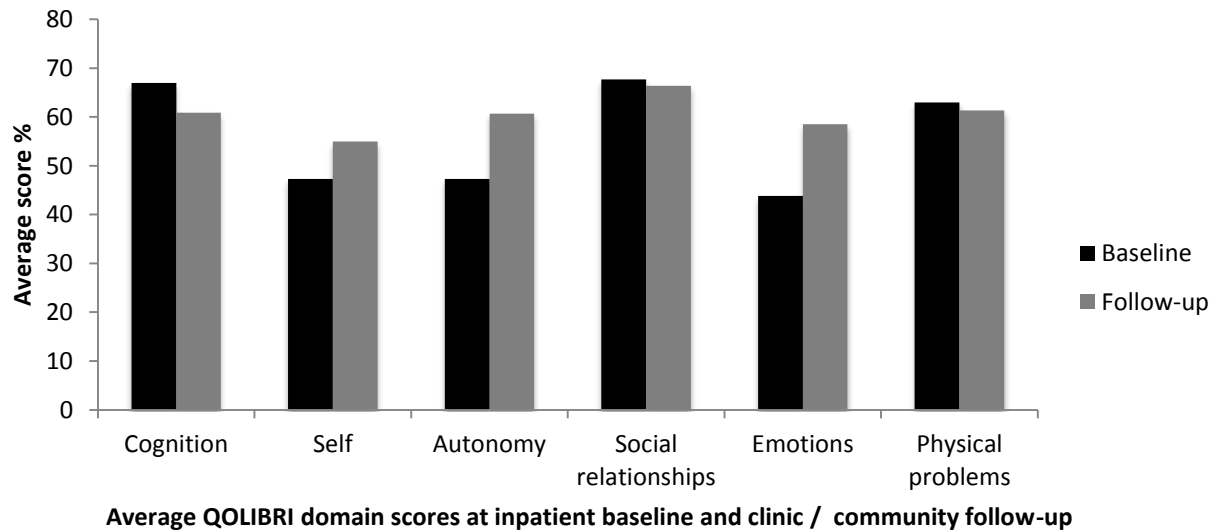

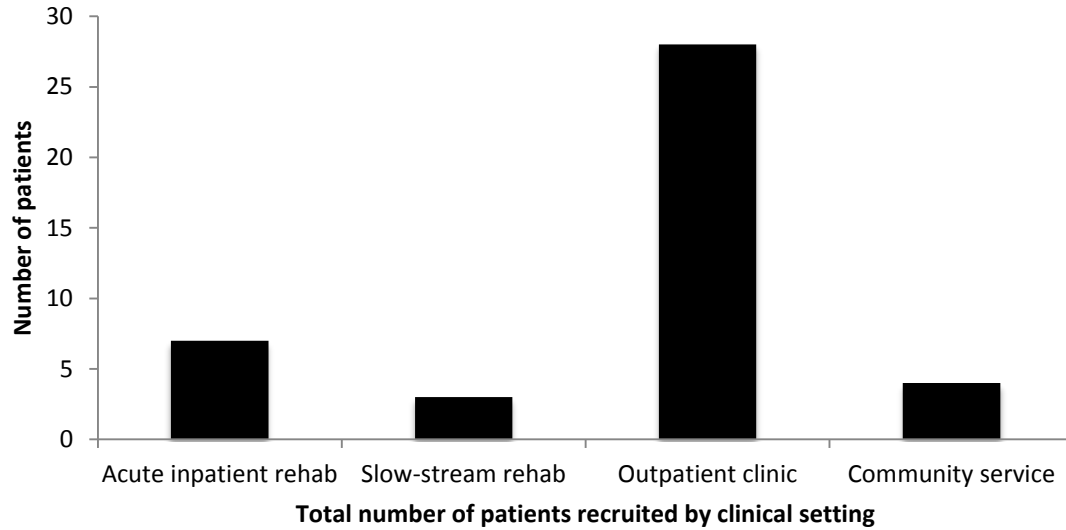

## Effects of injury

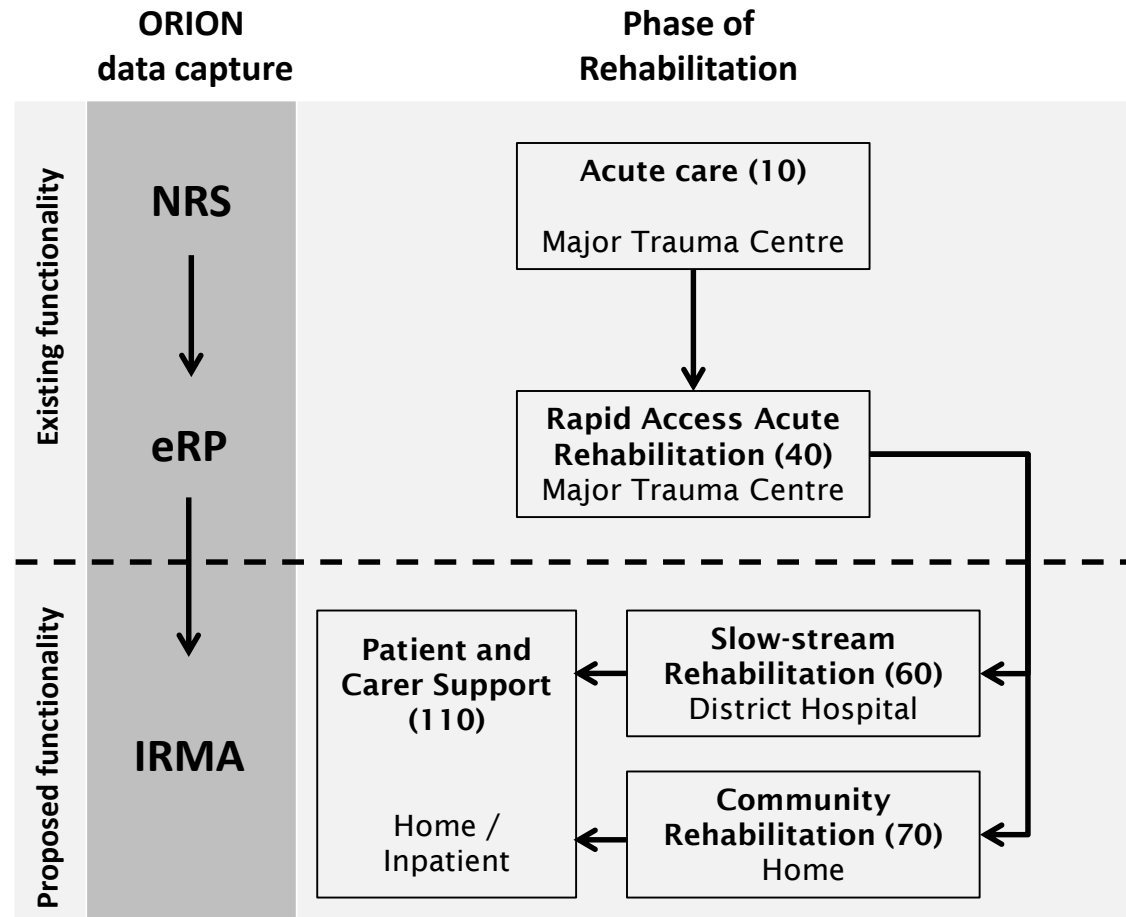

## Short-term outcome

# IRMA - feasibility study results

# Tracking progress through the rehabilitation pathway

- *Data capture and patient flow*
- *Interfacing and data sharing*
- *Reporting, benchmarking and service evaluation*
